

1. I have never been to the Redlands Airport. I could never find it.
2. I have been reading over the Redlands Municipal Airport Business Plan and I think it is a great plan. As it is I will be your biggest supporter of the plan.
3. Once I am elected as District 1 Councilmember I would request to meet with the Airport Board and help prioritize generating revenue and fight to implement them all by whatever means there needs to be.
4. I am about the safety and development of Redlands, however I have applied to be on the airport commission before and I am very interested. The Redlands Airport would be my personal priority to help develop it and do all that I can to be an advocate in a very strong way. I am willing to travel to Sacramento and Washington at my own expense, wherever it is I need to go and do to promote the growth and development of our Airport. I will be your biggest advocate on the board and you will be able to count on me.
5. I definitely think aviation and airport management experience is an advantage and more beneficial to operating an airport.
6. I believe any advisory board can be helpful depending on the makeup of the board. There has to be members with direct knowledge and affiliation with airport functions. I will be a fair and balanced with how I work with the board and the employees.
7. I would need to meet with the commission and employees to hear what they feel is the most pressing issue for our airport and at that time I will support and be your biggest advocate. I think the airport is our biggest asset that is the most overlooked. I would like to see it grow and develop with more commercial and freight business. I just think it is a commodity and we need to pay much more attention to it.
